

Bonbelle B2B & D2C web development

Redesigning the digital experience for Sweden's premium beauty & skincare destination

Role	Timeline	Platform	Year
Design & Development	6 Months	Mobile & Desktop	2025

Project Overview

A complete brand transformation for Bonbelle Beauty – spanning visual identity, digital presence, and campaign creative across five hero product lines.

Scope

- Complete UX/UI redesign of web and mobile platforms
- User research and persona development
- Design system creation and implementation
- Enhanced product discovery and checkout flow

Impact

145 %

Increase in Conversion

4.2x

User Engagement

The Challenges

The previous digital experience failed to capture the sensory appeal and premium essence of our beauty products, leading to low customer engagement and poor conversion rates.

Poor Visual Heirarchy

Designs were displayed in small thumbnails with cluttered layouts, failing to showcase their beauty and detail.

Complex Discovery

Users struggled to find product that matched their taste due to ineffective filtering and limited personalization.

Trust Barriers

Limited information about product authenticity created hesitation in making high-value purchases.

The Solutions

Our reimagined digital experience captures the sensory appeal and premium essence of our beauty products, driving higher customer engagement and improved conversion rates.

First Solution

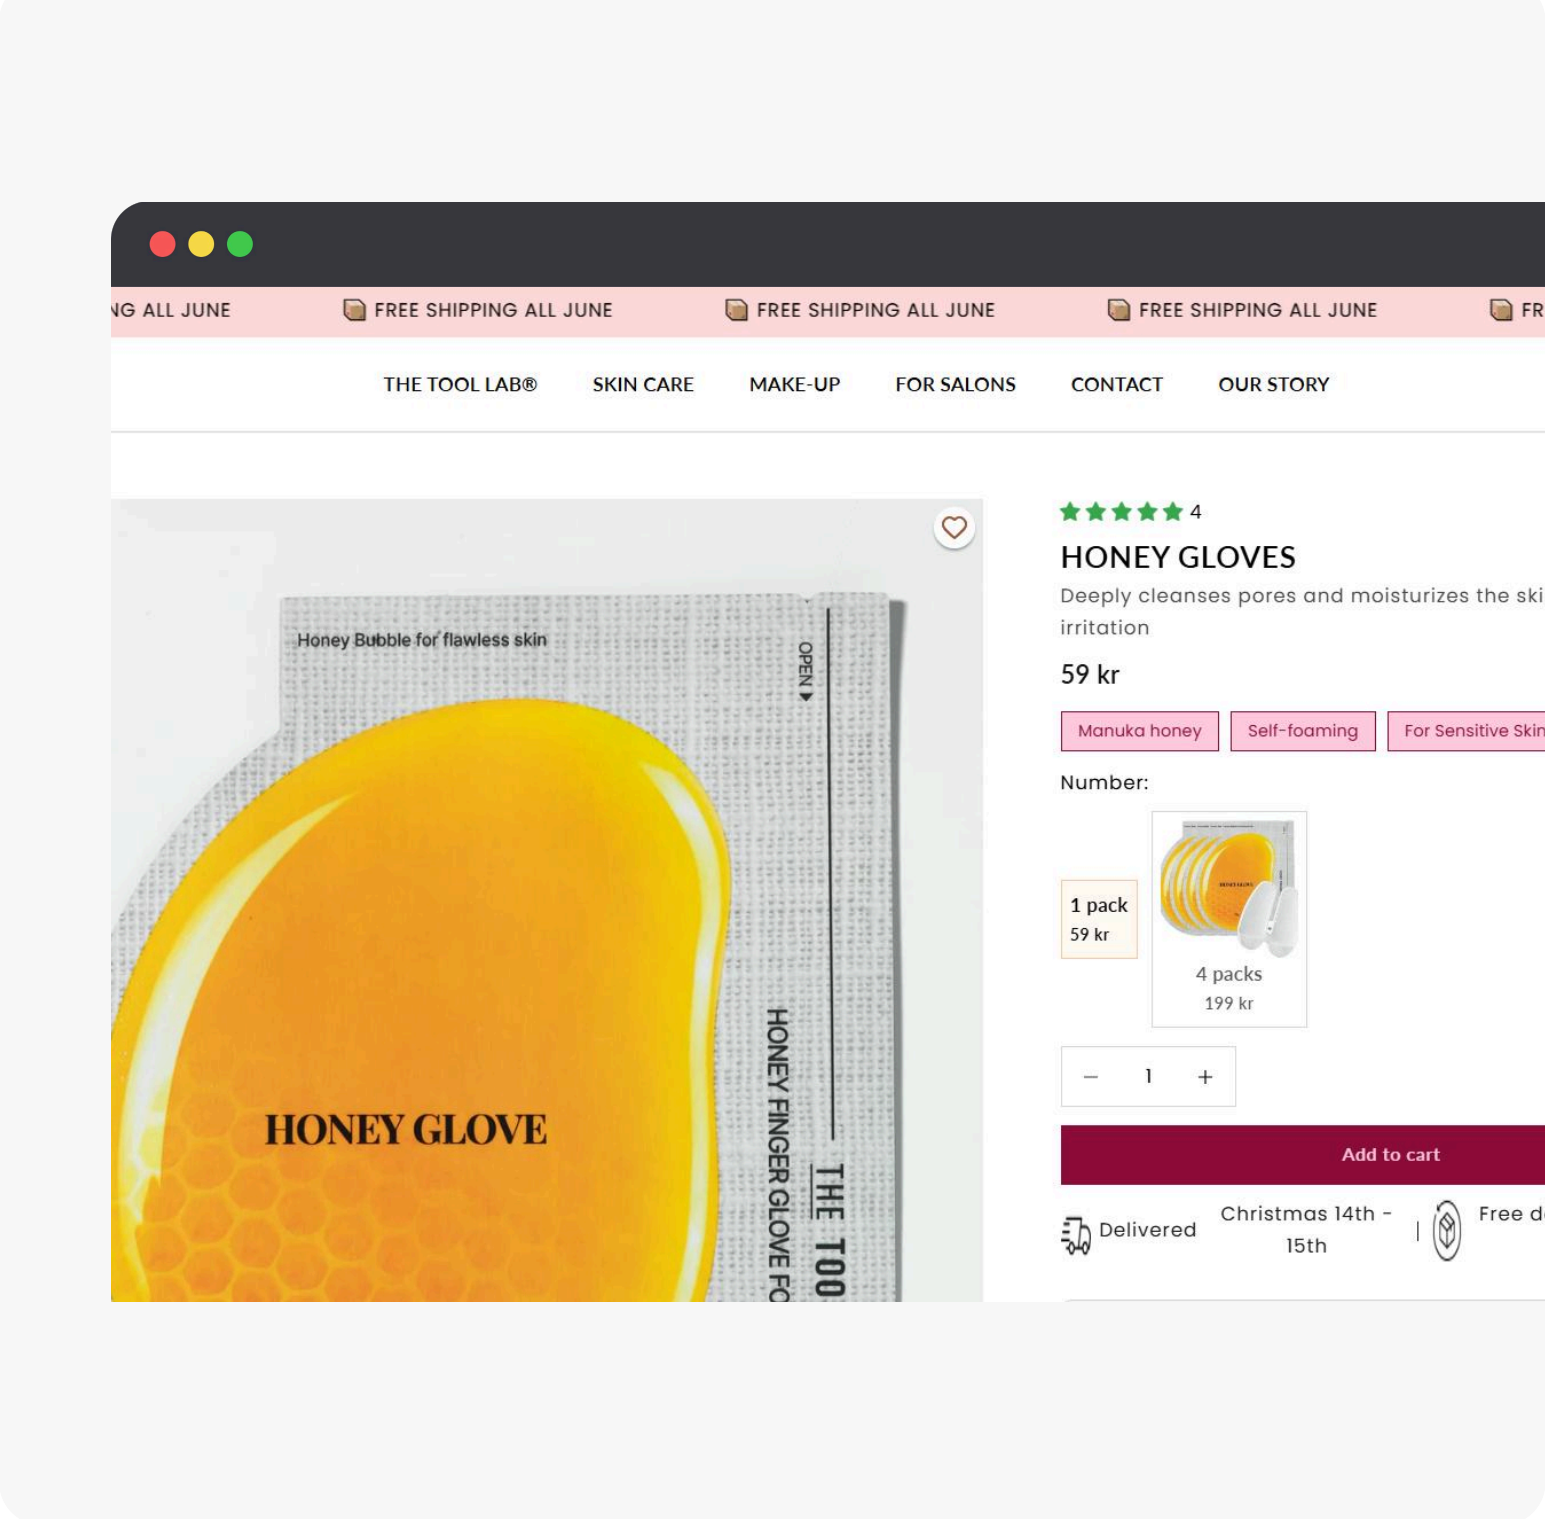

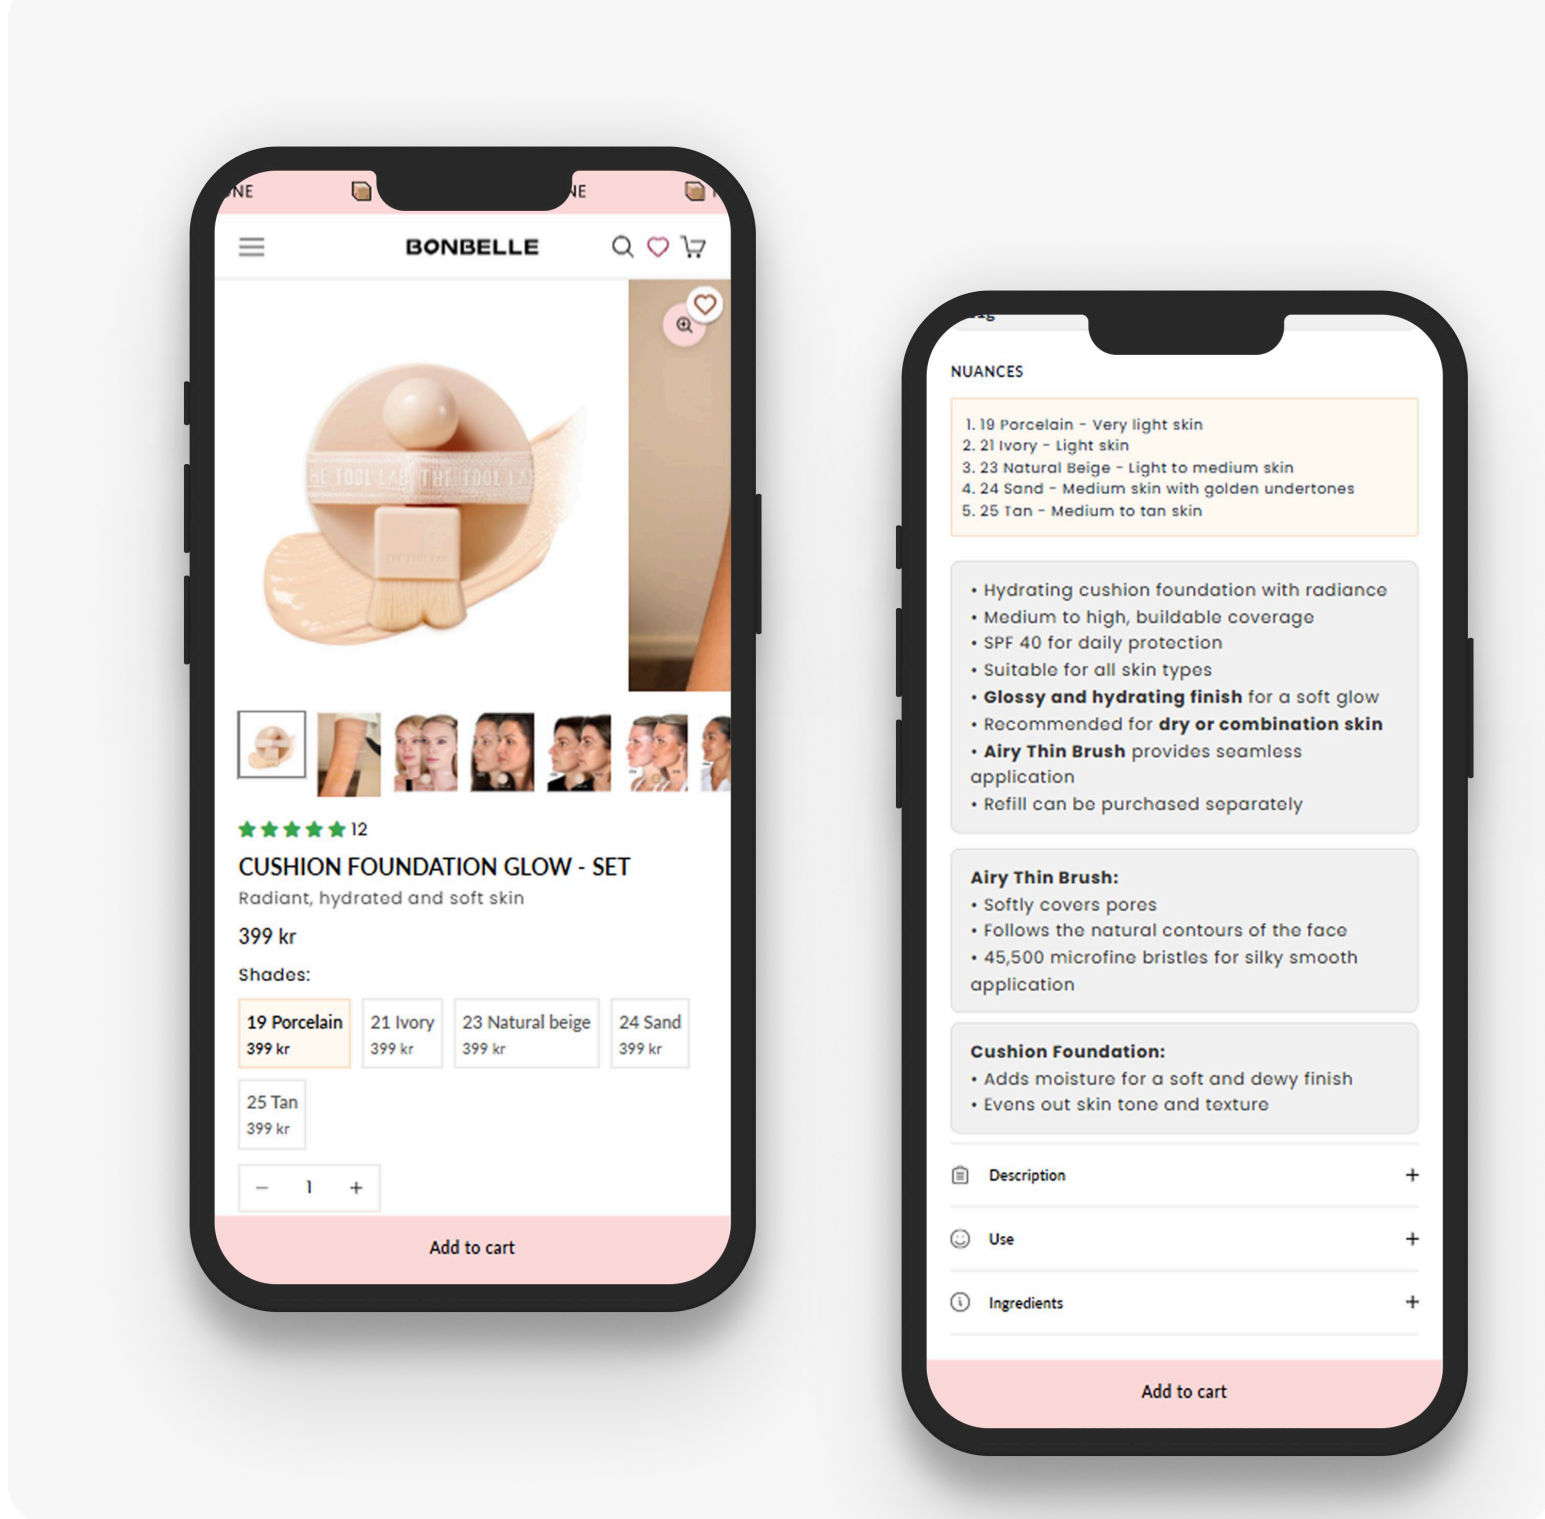

A simplified navigation and header structure designed to improve product discovery and make browsing artworks faster and more intuitive.

Second Solution

Organized categories and smart filtering options designed to simplify exploration and help users find the right product faster.

Third Solution

A redesigned product detail page with improved spacing, clear information hierarchy, and ratings to help users make confident purchase decisions.

Impact & Results

The redesigned platform exceeded all expectations, driving significant improvements across key business metrics.
