2025

Projektmål

Strategiska mål som driver vår lösning

Språk- och valutalokalisering

Skapa en smidig shoppingupplevelse optimerad för moderna föräldrar som köper babyprodukter.

Mobilt prioriterad användarupplevelse

Bygg en responsiv plattform som prioriterar mobilenvändare som representerar 70 % av alla som köper babyprodukter.

Performance Optimization

Deliver lightning-fast page loads to reduce bounce rates and improve user engagement.

Scalable Infrastructure

Build a robust foundation that can handle growth and peak traffic during promotional periods.

New D2C UI Designing

Create intuitive, conversion-focused interfaces that elevate your brand and deliver seamless shopping experiences across every device.

Purchase Experience Improvements

Optimize every step of the buying journey to reduce friction, increase customer confidence, and maximize completed purchases.

Problem Statement

Results that speak for themselves

Cluttered Product Cards

Product cards felt crowded, making it hard to quickly scan key details. Not very good first impression

"Too much information at once, I couldn't focus on what mattered." — User feedback

Dåligt Avstånd & Layout

Tätt avstånd och inkonsekvent justering fick gränssnittet att kännas tungt och svårt att navigera

"Allt kändes för trångt, det var visuellt överväldigande." — Användarfeedback

Weak Visual Hierarchy

Important elements like price, title, and CTA didn't stand out clearly. Not great for conversion

"I couldn't instantly spot the price or what to click next." — User feedback

Lack of Clear CTAs

Call-to-action buttons were not prominent, reducing engagement and conversions.

"I wasn't sure where to click to buy or explore more." — User feedback

Solution Provided

Results that speak for themselves

Simplified & Scannable Cards

Product cards were redesigned with a clear content hierarchy, prioritizing product image, title, and price.

Balanced Layout System

Introduced a consistent spacing system and grid structure to create breathing room between elements.

Stronger Visual Emphasis

Enhanced typography scale, contrast & positioning to highlight key elements like product title, price & CTAs.

Prominent & Action-Driven CTAs

Redesigned CTAs with high-contrast colors, clear labels, and better placement

Managing Shopify with Salesforce Commerce

Using Salesforce Commerce to streamline backend & management activities for Shopify Store

Datamigrering från Vendre till Shopify
